

### Overview of Standard Sizes for Rectangular Countersinks.

#### NOTES:

Standard configurations shown above provide an overview for planning, size and faucet projection.

All Vitraform Countersinks are made to specification, including unusual shapes, off center basins, holes for deck-mounted faucets and other site specific requirements. Drawings for approval are provided by the factory to include installation details and coordination of faucet specification.

Prices are by size, color and number of basins regardless of the shape of the bowl or the counter. See also pages 4.1.2-4 and 4.1.5-7 for Countersinks with Round or Oval bowls.

Mounting systems for Countersinks are shown on pg B.2.2-12 of the Hardware section.
